

Destiny Ghost Amigurumi

By: Aeishi Crochet

Terminology Used:

sc - single crochet

st - stitch

inc - increase (2 sc in one stitch)

dec - decrease (combine 2 stitches together)

Magic circle (or magic ring) - look up youtube tutorials if you are unsure of what this is :)

Materials:

G Hook - Used for whole pattern

White Worsted Weight (WW) yarn

Black WW yarn

Silver/Grey (shiny grey) WW yarn

Polyfill

Felt (in desired colors) - for customization

Hot glue - for customization

(stitch markers, yarn needle, scissors, other items to customize as needed)

Note:

(1 sc, 1 inc) around (18) <- This means to repeat the sequence in parenthesis until you complete the row. The numbers in parentheses at the end of each row in the pattern are how many stitches there should be completed at the end of the corresponding "row", I added these to make the pattern more beginner friendly and for aid if needed.

Detailed Assembly Instructions:

There are 10 pieces to sew together. This is the process that I take to assemble the ghost, I have gotten many questions about the pyramids in the pattern - so I'll try to be as detailed as I can on my explanation.

First stuff the "body" and attach the body sphere to the face. Use the white tail from the body sphere to attach the "face" piece. You'll want to leave a row of stitches between the sphere face and the sphere to create an "overhang", so sew in the face piece through the last row of stitches on the body. Make sure the body is well stuffed before completely sewing closed.

It should look like this with the face fully attached and stuffed.

To form the pyramid shape from the cones that were made, pinch the cone to where the increases are on the edges. This will create the 3 creases and give a triangular or pyramid shape to them. You'll want to keep this shape and attach them onto the body. Do not stuff them.

They will look like this from the bottom after pinching together to shape them.
This is for shaping purposes, when attaching them the sides do not have to be fully pressed in like above.

They will go from looking like a cone to a triangle shape, do this to all 8 of them.

I recommend attaching the four pyramids around the sphere's face side first, then sewing them / attaching the four to the backside afterwards to make alignment easier. Have the corners facing the front on each of the ones around the face.

The back side of it looks like this. I put the tail side of them on the backside to start attachment.

5 rows away from the magic circle on the body, I sew in the back of the triangle and work my way around. I relax the shape of the sides as I sew in the piece, and retain the creases to keep their shape. It will look like below when attached.

For the back pieces, I position them to where the creases meet at the magic circle of the body. Then I attach them and cover the remaining space of the body sphere.

It should look like the above image once fully attached.

With the grey yarn, single crochet into the edge stitches of the face piece, this will be around the inside lip created between body and the face pieces. Once fully around the circle, you can finish off and leave small tails. Pull the tails into the piece with a crochet hook.

You can do this part after attaching the pyramid pieces, or before doing so. The order of doing this part doesn't matter.

After following all of the above, you should have the base ghost (above photos) completed!

Final Steps... Add details with felt and hot glue. Customize as you wish and be creative~! :) Crocheting with different colored yarns also is an option to achieve the look you desire.
